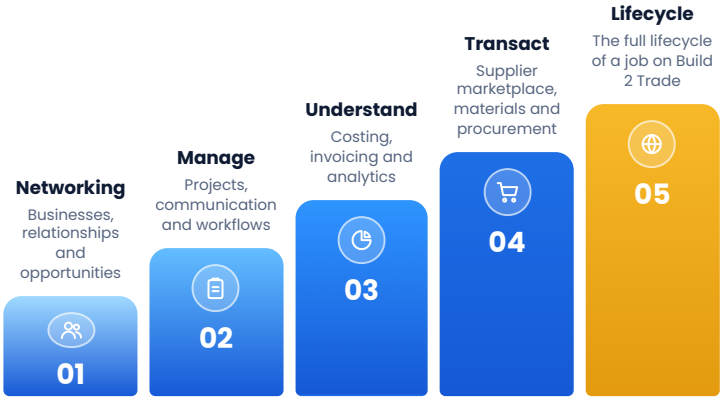
About Us

Built from 21 years in building and construction — for the builders who keep every job moving.

WHO IT CONNECTS

WHERE WE'RE HEADING



Build 2 Trade was built from 21 years of experience in the building and construction industry — and from firsthand experience of the problems builders face every day. We saw an industry full of platforms designed to benefit clients and trades, yet very few built to genuinely support the builder. Too often, the buck stops with the builder: chasing trades, dealing with last-minute cancellations, managing quotes across messages and emails, and accepting whatever option is available simply to keep a job moving.

Build 2 Trade was created to give builders control and autonomy over their projects. Builders can keep working with the trades they know and trust through our **Invite Preferred Tradies** feature, while also having access to a broader network when they need additional quotes, a new trade or reliable backup.

But we don't want Build 2 Trade to be just another quoting platform.

Our vision is to bring more of the building process into **one dedicated workspace**. Jobs, quotes, trade communication and contacts are managed on Build 2 Trade, reducing the need to search through messages, emails and multiple platforms just to find information about one project.

And we're only just getting started.

One of our latest developments is the **Build 2 Trade Suppliers tab**, designed to bring suppliers onto the platform. Our goal is to create a space where builders and trades can source what they need, compare options and build supply costs into their project planning — making cost projections even more useful.

Ultimately, we're building the platform we wanted for ourselves: a place where builders can post a job, access a ready network of trades, organise quotes, communicate with their team, source supplies and understand projected job costs — all on Build 2 Trade.

> **We want to put the passion back into building — by taking away the hours spent chasing people, searching through messages or paying for multiple platforms that each solve only one part of the problem.**

Suppliers

Suppliers are the third side of Build 2 Trade — connected directly to the builders and trades who need your materials.

• Available now

Business profile
Create a verified profile for your supply business.

Showcase products
List your products and materials.

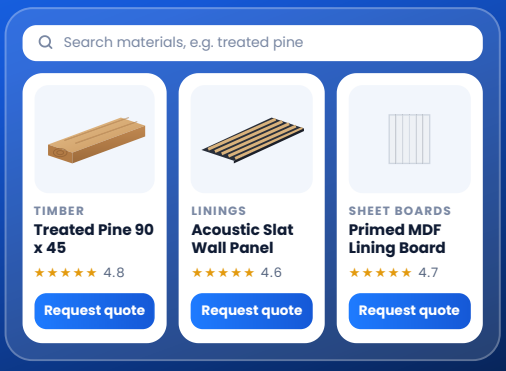
Quote directly
Send quotes straight to builders and tradies.

Build your reputation
Grow your professional reputation through completed projects, ratings and reviews.

Upcoming

Supplier Marketplace

Suppliers set up their storefront. Builders and tradies discover materials, compare offerings and request pricing.



THE SUPPLIER WORKFLOW

01 **Source Materials** → 02 **Connect with Supplier** → 03 **Receive Quote** → 04 **Book in Delivery**

The Supplier Marketplace is coming soon. Suppliers can already showcase products and quote builders and tradies directly.
